Portfolio: <https://wang-quan-portfolio.vercel.app>

CORE STACK

Frontend

React, TypeScript,
Next.js, Vite, WeChat Mini
Program, Tailwind CSS,
shadcn/ui

Backend

Node.js, Express, REST
APIs, validation,
transaction-aware business
logic

Database

MySQL, SQL, migrations,
import and eligibility
data modeling

AI / Media

voice cloning workflows,
lip-sync video generation,
RunningHub OpenAPI

Deployment

Git, npm/pnpm, PM2,
Tencent Cloud, Vercel-
ready portfolio

WANG QUAN

Junior AI Application / Full-Stack Developer

Computer Science graduate focused on AI application and full-stack development. Built and released a production WeChat mini program for course booking and verification, and developed an AI digital human creation platform integrating voice cloning, material management, and lip-sync video generation workflows.

SELECTED PROJECTS

TCM Course Booking & Verification Mini Program

Production v1.0 released |
WeChat Mini Program, React,
Node.js, MySQL

- Built a full booking ecosystem with a WeChat mini program, React/TypeScript admin dashboard, Node.js API, and MySQL database for course reservation and staff verification workflows.
- Implemented user login, phone binding, purchase eligibility checks, purchased-course-only display, class session booking, capacity control, waitlist handling, and QR-code based verification.
- Developed admin workflows for course/session management, appointment and waitlist records, verifier accounts, Excel purchase-list import, import exceptions, field configuration, student eligibility, and system settings.
- Supported production operation with deployed API/admin domains, Tencent Cloud server deployment, MySQL migrations, PM2 service restart flow, and safeguards around production data and environment configuration.

AI Digital Human Creation Platform

Portfolio project | Next.js,
TypeScript, RunningHub, Tailwind
CSS

- Developed a full-stack AI media workspace for creating digital human content from uploaded voice and portrait materials.
- Built voice synthesis features that accept script text and reference audio, call a voice-cloning workflow, and return generated audio for preview and download.
- Built video synthesis features that combine a selected portrait image with generated or uploaded audio to create lip-sync digital human video output.
- Implemented material library upload/list/delete flows, audio playback, image preview, task timers, generation cancellation, polling for RunningHub outputs, and file validation for smoother user operation.

GitHub: github.com/wqmumu
Portfolio: <https://wangquan-portfolio.vercel.app>

EDUCATION

Bachelor Degree in
Computer Science,
University of London, Jan
2023 - Oct 2025

Diploma in Information
Technology, Singapore
Institute of Management,
Jun 2021 - Aug 2022

LANGUAGES

English
Mandarin

WORK ELIGIBILITY

LTVP/PLOC work eligible in
Singapore. Documents
available upon employer
request.

ADDITIONAL PROJECTS

Selected Coursework Project Gallery

Private GitHub repositories |
React Native, Django, Node.js,
Python, C++, p5.js

- Organized 20 cleaned private GitHub repositories from SIM coursework, separating formal projects from early exercises and excluding reports, large files, generated caches, assignment documents, and private data.
- Built a portfolio gallery covering React Native mobile apps, Django/DRF platforms, Express database apps, NLP notebooks, C++/JUICE audio programming, and p5.js creative coding.

ThriftMate Mobile App

Expo, React Native, React
Navigation

- Built a mobile coursework app with browse/detail/favorites flows and reusable UI structure.

Django E-Learning Platform

Django, Django REST Framework,
Channels

- Built coursework platform code across course management, accounts, templates, static assets, and chat-related modules.

IMDB Sentiment Analysis

Python, Jupyter Notebook, NLP

- Completed NLP coursework notebook for movie-review sentiment analysis and model-result explanation.

C++ / Creative Coding Coursework

C++, JUICE, JavaScript, p5.js,
matter.js

- Completed supporting projects including a JUICE DJ/audio app, OOP data-processing projects, and interactive graphics demos.

EDUCATION

Bachelor Degree in Computer Science University of London | Jan 2023 - Oct 2025

Diploma in Information Technology Singapore Institute of Management | Jun 2021 - Aug 2022

LANGUAGES

English and Mandarin
